## INTRODUCTION

It is the legislated policy of the Federal Government that small businesses small disadvantaged businesses, women-owned small businesses, \*HUBZone small businesses, veteran-owned small businesses, and service-disabled veteran owned small businesses shall have the maximum practicable opportunity to participate in the performance of Federal contracts. Federal contractors are required to carry out this policy in the awarding of subcontracts to the fullest extent consistent with the efficient performance of the contract.

Public Law 95-507 requires contractors (except small business concerns) receiving a Federal contract exceeding \$500,000 (\$1,000,000 for construction), which offers subcontracting possibilities, to establish subcontracting plans that provide maximum contracting opportunities for various categories of small business concerns. The law also requires contractors to establish goals for these concerns in their subcontracting plans. In addition, Public Law 100-656 established a government-wide goal of 5 percent for small disadvantaged businesses; this goal pertains to the agency's total value of all prime contract and subcontract awards for each fiscal year.

Other provisions of law require contractors to maximize subcontracting opportunities to women-owned small business concerns, HUBZone small business concerns, and veteran-owned small business concerns. It should be noted that there is also a government-wide goal of 5 percent for women-owned small business concerns. The goal, which was mandated in Public Law 103-355, pertains to the agency's total value of all prime contract and subcontract awards for each fiscal year. In addition, Public Law 105-135 established a government-wide goal for certified small business concerns located HUBZone areas. The government-wide goal for HUBZone small businesses is 3 percent. Also, Public Law 106-50 established prime and subcontracting goals for service-disabled veteran-owned small businesses. In addition, the law established a government-wide goal of 3 percent for service-disabled veteran-owned small business concerns; the goal pertains to the total value of all prime contract and subcontract awards for fiscal year.

The subcontracting program is governed by the Small Business Act, as amended, and the implementing procurement regulations are contained at the Federal Acquisition Regulations (FAR) Part 19, Subparts 19.7 and 19.12 and Part 44.

\*Historically Underutilized Business Zone (HUBZone). For additional information on the HUBZone program, visit the Internet at [www.sba.gov/hubzone](http://www.sba.gov/hubzone).

A subcontracting plan provides for the establishment of goals and contains other provisions to ensure that the potential capabilities of small business, small disadvantaged business, women-owned business, HUBZone small business, veteran-owned small business and service-disabled veteran-owned small business concerns are fully considered for use. The plan may apply to a specific contract requirement or the entire production of a commercial product. In establishing subcontracting goals, the contractor may include all purchases which contribute to the performance of the contract, including a proportionate share of the product or service costs which are normally allocated as indirect costs. A company official is appointed to administer the plan.

This subcontracting directory has been prepared by the U. S. Department of Agriculture's Office of Small and Disadvantaged Business Utilization (OSDBU) to provide general information and guidance to small business concerns seeking business opportunities with USDA prime contractors. It identifies the contractors who do business with USDA, the prime contract number(s), the company's major product/service line, the company's Small Business Liaison Officer (SBLO), and the types of subcontracting opportunities that are available. The SBLO is the person to contact in regard to upcoming subcontracting opportunities. If there are no immediate subcontracting opportunities in your areas of expertise, you should inquire about commercial prime contracting opportunities. Contract numbers are not provided for contractors who have several prime contracts with USDA, but rather the frequency of the procurements is identified.

OSDBU was created to provide leadership and guidance on the small and disadvantaged business programs for USDA. OSDBU is responsible for implementing the procurement programs under Sections 8 and 15 of the Small Business Act, as amended, and has oversight responsibility on all matters pertaining to such programs including subcontracting. Subcontracting is a major area where small business, small disadvantaged business, women-owned small business, HUBZone small business, veteran-owned small business and service-disabled veteran-owned business concerns can substantially impact the Federal small business programs. OSDBU Coordinators have been assigned to the contracting agencies to carry out the programs at the operational level. The name and telephone number of the Agency OSDBU Coordinator is listed at the end of each section.

OSDBU also assists contractors in developing subcontracting plans and locating small business sources. In addition, the Small Business Administration's Commercial Marketing Representatives (CMRs) assist prime vendors in locating small firms to work as subcontractors.

## **THE USDA MARKETPLACE**

The contracting function at USDA is highly decentralized; there are 11 major contracting agencies and more than 200 field procurement offices. Most large procurements requiring a subcontracting plan take place at the headquarters levels or at major designated procurement centers.

Approximately 60 percent of USDA's procurement budget is spent purchasing food commodities in support of various domestic and export feeding programs. It is not surprising, therefore, that more than 80 percent of the subcontracting activity is carried out by food commodity contractors. This trend is slowly changing as more and more large contracts are awarded in the technical and administrative support areas.

USDA projects that in Fiscal Year 2007 its prime contractors will spend approximately \$800 million in subcontract awards in support of USDA programs. Of that amount, we have established a goal of 33 percent for subcontracts to small business concerns, 5 percent for subcontracts to small disadvantaged business concerns, another 5 percent for subcontracts to women-owned small business concerns, 3 percent for subcontracts to HUBZone small business concerns, 3 percent for subcontracts to veteran-owned small business concerns, and another 3 percent for subcontracts to service-disabled veteran-owned small business concerns.

Because of the large volume and capital intensive nature of the food commodity procurements, traditionally many categories of small businesses have not been able to take full advantage of the opportunities offered by USDA contracts and subcontracts. As part of a USDA management initiative, emphasis will be placed on subcontracting with small business concerns, as a means of expanding their participation in USDA procurements.

Prime contractors are encouraged to seek innovative ways to increase the participation of small business concerns in USDA procurements. To the extent feasible, major negotiated acquisitions will contain evaluation criteria provisions which take into consideration the prime contractor's efforts and the extent of subcontracting with small business concerns. OSDBU is actively involved in the review of subcontracting plans.

To obtain more information on a specific contractor or to inquire about additional subcontracting opportunities, please contact the prime vendor's Small Business Liaison Officer or the USDA Contracting Agency OSDBU Coordinator. The OSDBU Coordinators are listed at the end of each section. You can also contact the USDA Subcontracting Program Manager, Sherry Cohen at [SherryR.Cohen@usda.gov](mailto:SherryR.Cohen@usda.gov).
